

Beaufurn is Building a Breakthrough with ACRE™

Beaufurn has formed an exclusive partnership with ACRE™ wood for use in hospitality and healthcare environments on indoor and outdoor components including table tops and arm caps.

ACRE™ is a new material, suited for a wide range of applications.

Produced without touching a single tree, ACRE™ relies on up-cycled rice hulls. Rice hulls provide incredible resistance to water, weather, rot and pests along with great beauty and texture. ACRE™ is 100% waterproof — traditional maintenance and replacement associated with wood is not necessary.

NATURAL BEAUTY

- Warm look and feel of wood
- Natural-looking grain
- Selected range of Beaufurn finishes

UNMATCHED DURABILITY

- 100% resistant to water, weather, pests and rot
- High UV- and fire-resistance
- No fading, splintering, cracking or warping
- No special maintenance or cleaning methods needed

SUSTAINABILITY

- Made in the U.S.A.
- 100% tree-free
- Zero-waste manufacturing
- 100% recyclable

TECHNICAL BENEFITS

- Uniform texture and finish-ready edge throughout
- Flexible and thermoformable
- Perfect for curved applications

Better Building, One Tree-Free Board at a Time.
A perfect replacement for cedar, teak and ipe
